PROFESSIONAL SUMMARY

Senior Full-Stack .NET & AI Systems Engineer with 3.5+ years of rapid promotion history (Trainee to Software Engineer III) architecting scalable enterprise microservices, Angular SPAs, and LLM-powered backend workflows. Proven track record building automated financial transaction reconciliation engines, real-time voice streaming pipelines, and high-performance SQL architectures. Technical stack: C#, .NET Core 8/9, ASP.NET Web API, Angular, TypeScript, SQL Server (T-SQL), Redis, RabbitMQ, and RAG pipelines.

WORK EXPERIENCE

Onflo Mumbai, India

Software Engineer III (AI & Full Stack / Backend) June 2026 – Present

- **Lead** technical architecture for real-time AI voice routing, orchestrating autonomous LLM agents via LiveKit WebRTC with **sub-200ms latency**.
- **Design** intent-based dispatch workflows parsing live LLM transcripts, reducing misrouted calls by **35%** and hold times by **30%**.
- **Partner** with cross-functional Data Science and UI teams to standardize WebSocket and REST contracts, ensuring **<50ms latency for 50+ streams**.
- **Drive** engineering standards, conducting architectural design reviews and mentoring junior developers on .NET microservices and clean code.

Software Engineer II June 2025 – June 2026

- **Engineered** an automated reconciliation engine from scratch in .NET Core and SQL Server, eliminating manual spreadsheets and processing **10K+ daily financial transactions**.
- **Optimized** T-SQL stored procedures, indexing, and relational schemas to accelerate batch reconciliation query performance by **40%**.
- **Developed** an asynchronous ingestion pipeline with dead-letter queueing and tenant isolation, maintaining **99.9% batch uptime**.
- **Optimized** webhook ingestion workers handling **20K+ daily events**, eliminating state race conditions via a centralized state machine.

Software Engineer I August 2024 – June 2025

- **Developed** full-stack features using Angular, TypeScript, and ASP.NET Core Web API, delivering responsive SPAs with modular component architecture.
- **Authored** internal shared NuGet packages adopted across **5+ backend teams**, standardizing API error handling and structured logging.
- **Benchmarked** routing throughput by developing a load-testing harness simulating **500+ concurrent calls** before production rollouts.
- **Automated** local development environments via Docker Compose for .NET microservices and databases, reducing onboarding setup time by **50%**.

Trainee Technical Analyst June 2023 – August 2024

- **Decomposed** a legacy ASP.NET MVC monolith into modular ASP.NET Core APIs and Angular components, cutting page latency by **40%**.
- **Scaled** high-volume IVR and call-distribution algorithms to reliably support **25K–30K daily inbound calls**.
- **Accelerated** routing configuration retrieval speeds by **10x** by migrating in-memory caching to a distributed multi-node Redis cluster.

PROJECTS

School Rulebook AI Search (RAG) | Live Demo | Code Python, Gemini, Render

- **Built** a Retrieval-Augmented Generation (RAG) QA service indexing **150+ pages** of institutional guidelines using Google Gemini embeddings.
- **Constructed** prompt guardrails with negative constraints to eliminate hallucinations, maintaining factual accuracy above **98%**.

LastTime – Activity Tracker | Live Demo | Code .NET Core, Angular, SQL

- **Delivered** a full-stack timeline tracking platform powering **40+ REST endpoints** via ASP.NET Core API and an Angular SPA.
- **Structured** normalized relational database schemas with B-tree indices, maintaining **sub-50ms query response times**.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, TypeScript, JavaScript, Python, .NET Core 8/9, ASP.NET Web API, Entity Framework Core, Angular, ASP.NET MVC
- **AI & Real-Time Systems:** LLM Integration (OpenAI, Gemini), RAG Pipelines, Vector Embeddings, WebRTC (LiveKit SFU), SignalR
- **Databases & Tuning:** SQL Server (T-SQL, Stored Procedures, Indexing, Performance Tuning), PostgreSQL, Redis (Caching, Streams)
- **Cloud & DevOps:** Azure (App Services, Blob Storage, Azure OpenAI), Docker, CI/CD Pipelines, Git / TFVC, Agile/Scrum
- **Architecture & Patterns:** Microservices, Design Patterns, CQRS, RESTful APIs, JWT Authentication, Idempotency, Load Testing (k6)

EDUCATION

University of Mumbai Mumbai, India

Bachelor of Engineering in Computer Science 2019 – 2023
